

AROMATIC COMPOUNDS OF ARÔBOIS Toasts

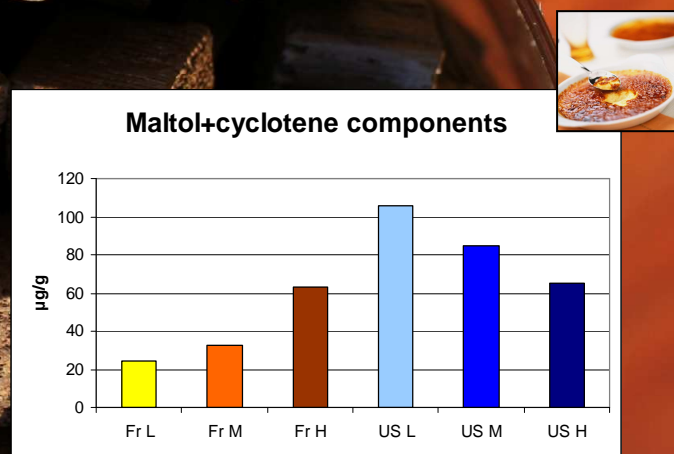

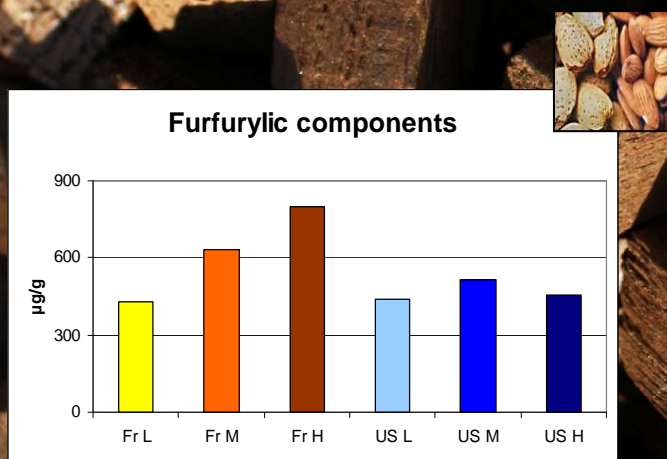

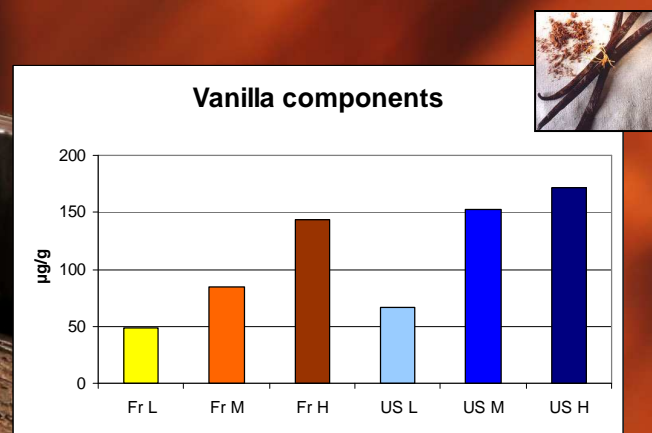

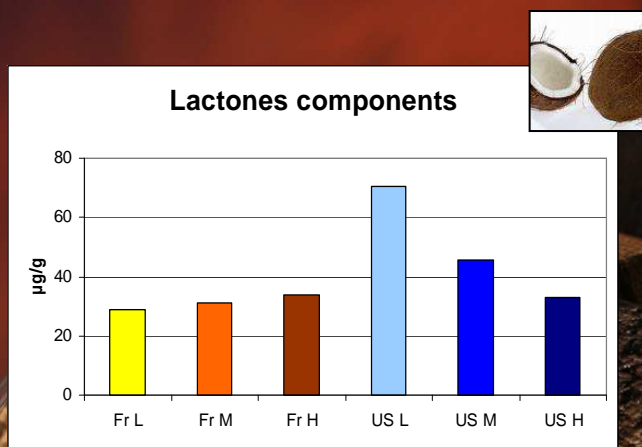

The Arôbois toasts range is very coherent with gradual distinctions from one toast to the next.

French Oak

- French oak, light toast
- French oak, medium toast
- French oak, heavy toast

American Oak

- American oak, light toast
- American oak, medium toast
- American oak, heavy toast

American oak and French oak react differently to the same toast.

Results of a study led by an external laboratory on the characterisation of Arôbois toasts. Analyses of principal volatile compounds by gas chromatography and mass spectrometry. Analyses of aromatic aldehydes and principal furfurylic compounds of toasted oak by High Performance Liquid Chromatography and UV-visible detection.
